

Positively the best electrical contractors

2012 Highly Commended, SME Category: Constructing Excellence North East
2012 Medium Sized Business of the Year: Sunderland Echo Portfolio Awards
2011 Training Award Winner: Sunderland Echo Portfolio Awards

We have one simple aim – to be your first choice electrical solution

With more than 40 years experience, we are one of the North of England's leading electrical companies. Our multi skilled, highly trained team has delivered a string of groundbreaking projects on time, safely and within budget.

We are committed to our clients' operational and business needs and strive to deliver intelligent technical solutions, which offer cost savings and added value.

A range of quality assurance techniques are applied and we hold industry recognised accreditations.

Some of our clients include:

- A J Bennett
- City Of Sunderland
- Gentoo
- H. Malone
- Keepmoat
- Laing O'Rourke/Crown House Technologies
- Leybourne Urwin Ltd.
- Robertson Construction
- Southdale
- Surgo Construction
- Turney Wylde
- Vinci Construction
- Willmott Dixon

What we do

Our services include:

- Design
- Fire alarm systems
- Lighting controls
- Feature lighting
- Power and distribution systems
- CCTV
- Warden call / nurse call
- External lighting
- Solar power and photovoltaics (PV) – MCS approved

The areas in which we are particularly experienced are:

Supported housing

Hospitals & healthcare

Commercial, education & prisons

Our commitment to safety

Health and Safety (H&S) is of paramount importance to us and robust training and planning ensures the highest of standards.

Our commitment includes:

- Independent H&S advisor
- Site safety files
- Tool box talks
- Chas registration
- Safety courses – IPAF, PASMA, SSSTS

Supported housing

Wentworth Court, Newcastle

A new temporary accommodation and assessment centre for Newcastle City Council. Our scope of works here was to design, supply and install CCTV, access control, fire alarms, general lighting and power systems for the centre, which will provide 45 high quality, extremely robust self contained apartments.

Kibblesworth Housing, Gateshead

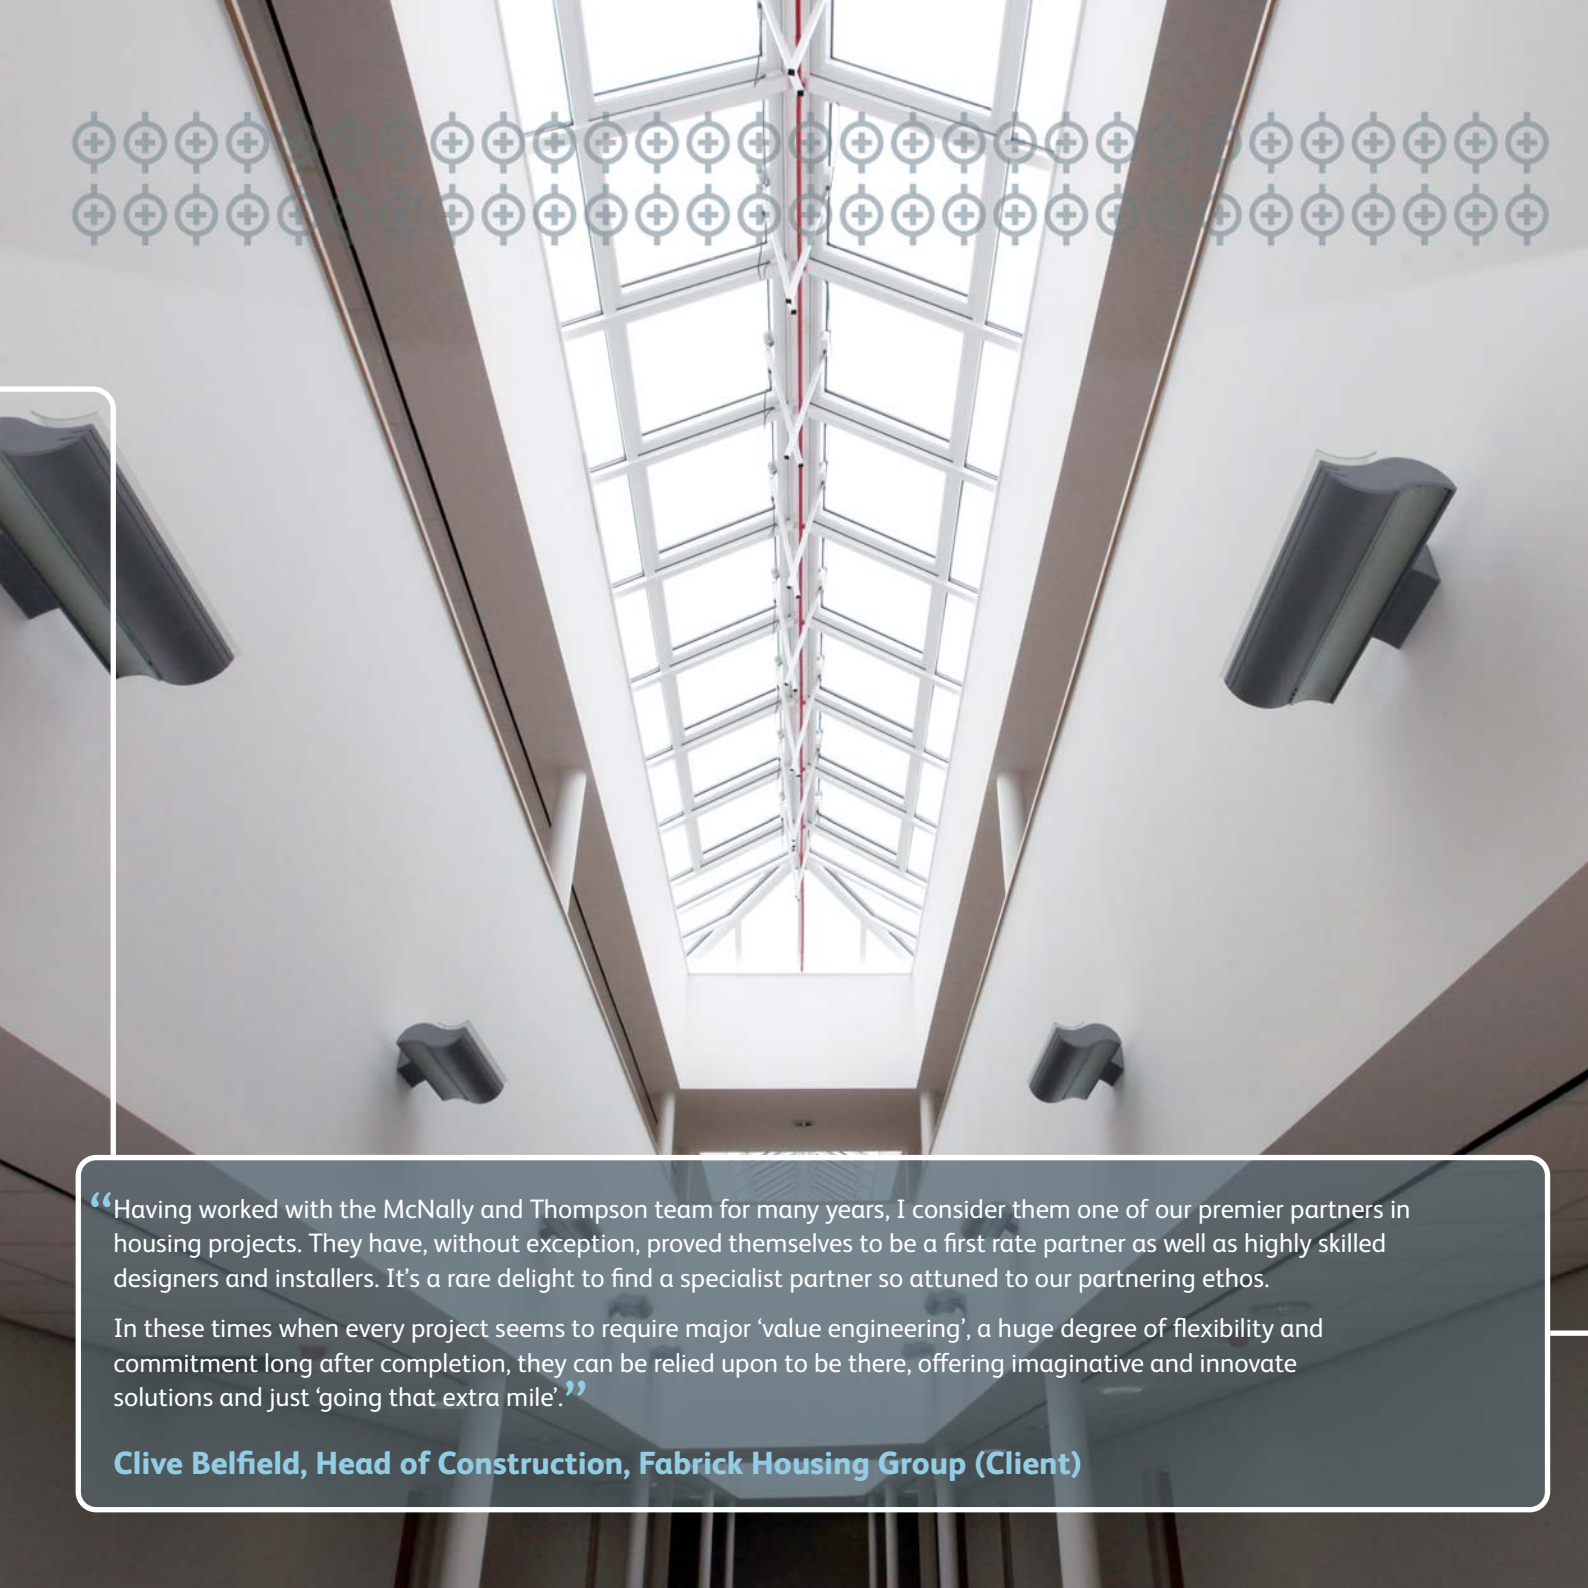

A split site of new build homes for private sale and for rent by the Gateshead Housing Company, the contract included all of the domestic electrical installation.

Fordfield Road, Sunderland

An exciting new retirement village in the heart of Sunderland. This extensive project involved the design and installation of the site-wide low voltage network, fire alarms, call systems and door entry as well as the CCTV, data installations, general lighting and power to 175 apartments.

Levick House, Middlesbrough

A specialist building for Middlesbrough Borough Council, split into twenty sheltered accommodation units and a sixteen bed respite care block. The work included staff call / attack and fire alarm systems, the installation of 20 solar PV. arrays to generate electricity, heat recovery ventilation units and low energy LED lighting. Within a glazed atrium an aspirating smoke detector system with opening vents was installed.

“Having worked with the McNally and Thompson team for many years, I consider them one of our premier partners in housing projects. They have, without exception, proved themselves to be a first rate partner as well as highly skilled designers and installers. It’s a rare delight to find a specialist partner so attuned to our partnering ethos.

In these times when every project seems to require major ‘value engineering’, a huge degree of flexibility and commitment long after completion, they can be relied upon to be there, offering imaginative and innovate solutions and just ‘going that extra mile.’”

Clive Belfield, Head of Construction, Fabrick Housing Group (Client)

Hospitals | Healthcare

Ward 5, Queen Elizabeth (QE) Hospital, Gateshead

This conversion contract transformed the ward into an 'agile' office space giving healthcare workers a more open environment for collaborative working. The contract included the stripping out of the ward, followed by the installation of new lighting and power, with modifications to existing switchgear and fire alarms.

IT Server Room, QE Hospital, Gateshead

This involved the provision of the complete electrical services to a new server room within the hospital.

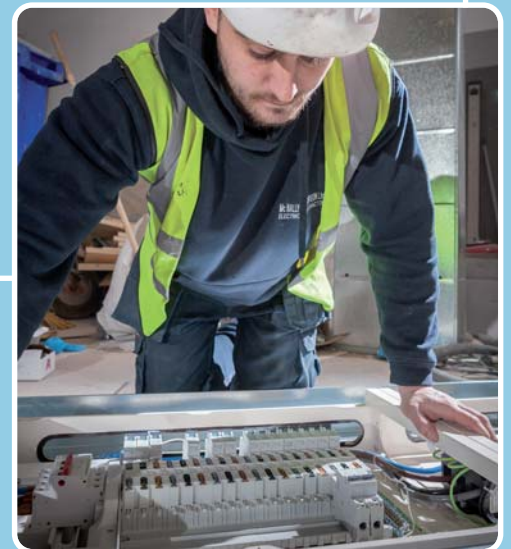

Royal Victoria Infirmary, Newcastle

Installing over 14 miles of cabling, we delivered electrical expertise and services for a £300 million, eight-year investment programme at the hospital.

Within the two new clinical blocks we provided the primary electrical services and containment systems for sub contractors in the general office space, teaching rooms and lecture theatre.

Our work on the Culture Centre – described as the jewel in the project's crown – was the most technically detailed job we have undertaken to date. Once the galvanised trunking and conduits had been installed, the building was wired for and fitted with bespoke lighting systems, including sophisticated, intelligent dimming throughout.

We also provided the containment systems for specialists and general lighting and power systems in the café space, meeting rooms, boardroom and staff gymnasium.

Commercial | Education | Prisons

Trinity Square, Gateshead

Selected to work on the Primary Care Centre, being constructed as part of the Gateshead town centre redevelopment, we delivered a twelve week fast track programme which included working at height to install lighting, power, access control and CCTV systems.

Durham University, Durham

A boiler house replacement including the delivery of the upgraded electrical works, alongside mechanical contractors, on a tight timescale – during the summer recess.

Freudenberg Factory Unit, North Shields

This involved the complete refurbishment of a fire damaged production unit, including mechanical controls wiring, low bay factory area lighting, fire alarms and general small power and lighting.

Frankland Prison, County Durham

New Integrated Drug Treatment Station within the live wing of a category 'A' prison, consisting of the installation and commissioning of general alarms, fire alarms, general lighting and power into extremely robust rooms, to form this new facility within the prison.

Castington Prison, Northumberland

A new clinic within an existing live prison required general lighting and power upgrades, fire alarms and general alarms.

Our office team

People are our most important asset and through support, encouragement and training we strive to help every individual fulfil their true potential. This creates a well trained and motivated workforce – the right people, with the right skills and the right attitude – equipped to provide an excellent service.

As a result, over 90% of our clients return to us for further work.

Fred Hood | Managing Director

Fred has a wealth of experience in the electrical industry. He has been owner of McNally and Thompson since 1997 and has always put the customer first – providing that all important professional service. In his spare time Fred is a religious man – his religion is football and he spends match days at Sunderland Stadium of Light... praying a lot!

fhood@mcnallyandthompson.co.uk

Ian McGray | Contracts Manager

Ian has over 25 years' experience in the electrical industry and has developed a particularly strong working relationship with clients. He has had extensive experience of contracts management, delivering on time and within budget.

In his spare time Ian is a keen fisherman.

imcgray@mcnallyandthompson.co.uk

Mike West | Estimator

Mike has been in estimating now for 20 years and is the contact point for customer pricing enquiries. His work is accurate and precise, allowing him to meet some tight deadlines.

In his spare time Mike races model cars at National Level.

mwest@mcnallyandthompson.co.uk

Jackie Winship | Office Manager

Jackie has worked in office administration for over 25 years. Her experience in administrative activities and Sage accounts is vast and facilitates the smooth running of the office. In her spare time she enjoys the odd glass of red and shopping.

jwinship@mcnallyandthompson.co.uk

Hayley McAllister | Administration Assistant

Hayley is our administrative 'Girl Friday' and is a great asset to the company. She is the first point of contact and is very helpful and pleasant to work with. In her spare time Hayley likes to go out with friends and keeps fit in the gym.

hmcallister@mcnallyandthompson.co.uk

David Nelson | Contracts Engineer/ Estimator

David is a time served electrician and currently studying for an H.N.C. in Electrical Engineering. He carries out a dual role of Contracts Engineer/ Estimator and is involved in pricing smaller contracts and overseeing live contracts. In his spare time David enjoys both playing and watching football.

dnelson@mcnallyandthompson.co.uk

“I have worked with McNally and Thompson for seven years. Their ability to deliver cost effective solutions can make the difference between a project progressing or falling at an early stage. They take the challenge of managing multiple specialist providers away from the main contractor, providing a predictable service that will complete on time.”

Tony Stafford – Stafford Project Management
